

Baby Resuscitation Platform

A mobile, low-cost, newborn resuscitation aid, designed to be used immediately after delivery

Providing immediate stabilisation at birth

Allowing resuscitation to be performed successfully in the delivery room or theatre

A practical and portable device

Robust design that can be easily transported between delivery locations

Saving lives around the world

Designed to be used in low-resource settings, where there is limited access to advanced resuscitation equipment

Baby Resuscitation Platform

The Diamedica Baby Resuscitation Platform is a portable and low-cost, newborn resuscitation device. Designed to be used following delivery in low-resource settings where there is limited access to advanced resuscitation equipment.

The mobile trolley assists with stabilisation after birth, meaning resuscitation can be performed successfully and safely in the delivery room or theatre.
