

Helix Portable Ventilator

a versatile ventilation system assisting breathing around the world

First choice

Ideal as first response
in disaster situations

Flexible

Portable and driven
by air or oxygen

Sustainable

No electricity required -
functions when power fails

Helix Portable Ventilator

Use the Helix Portable Ventilator in conjunction with Glostavent® Portables for mechanical ventilation.

Lightweight for portability and contained in an optional Peli shockproof and waterproof case, this is an ideal first response ventilator.

Versatile

- Can be used as standalone equipment, or in conjunction with Diamedica's Portable Anaesthesia systems
- Suitable for adult and paediatric patients
- For use in theatre, post-operative ventilation or in ICU or PICU
- Provide effective and efficient ventilation in difficult environments
- Ideal as first response ventilator for disaster and conflict situations or remote outreach work
- Will use drive gas from any suitable source including oxygen concentrator, cylinder or air compressor
- Suitable for low resource settings

Cost effective

- Do not require the use of high flow rates of expensive compressed gases
- A single 10 l/min oxygen concentrator can run three Helix Adult/Paediatric Ventilators
- Very low running costs
- Require minimal maintenance

Reliable

- Function in the absence of electricity
- Internal battery life of 100hrs

Optional extra: Helix Compressor Pump

- A battery powered air compressor pump can be supplied that will power the Helix Portable Ventilator for emergencies and remote situations where there is no electricity to operate an oxygen concentrator and there are no compressed gas cylinders
- Packed in a small Peli case weighing less than 3kg, the Helix Compressor Pump contains internal battery, battery charger and pump which will run the ventilator for up to 20 hours continuously on a single charge

Design highlights

- Use only low flow rates of gas
- Recycles drive oxygen to patients
- Optional shockproof and waterproof Peli case

Helix Portable Ventilator

Specifications			
Requires electricity to function	No	Inspiratory pressure range	8 - 50cm H ₂ O
Mode of operation	Time cycled, volume limited, pressure generator	Breaths per minute	6 - 40
		Triggered breathing control	1 - 5cm
Ventilator type	Pneumatic piston driven	Drive pressure/ volume	≥ 20psi / >5l/min volume
Drive gas	Any suitable gas source: oxygen concentrator, cylinder or air compressor		
Suitable for non-invasive ventilation	Yes	Weight and dimensions <i>Including circuits:</i> Weight Dimensions	9.1 kg (Unpacked weight inclusive of circuit) Height 40cm (Helix Screw closed) 48cm (Helix Screw Open) Diameter 26cm (Inclusive of valve)
Suitable for invasive ventilation	Yes		
Tidal Volume	100-1200ml		
Inspiratory/expiratory ratio	1: 2		
Alarms	High and low pressure with LED indicators, disconnect, mute		
Power supply	12volt Lithium battery (Rechargeable from mains power A/C or vehicle D/C)	CE certified by an internationally recognised notified body	Yes
Internal rechargeable battery backup	>100 hours		

Training and support

- Full training is available
- Free technical support is available for the lifetime of the machine
- Each unit is supplied with a comprehensive user manual and training demonstration videos
